a³ ~~The apparatus is structured in such a manner that, when~~ An electrotherapy apparatus for
generating first and second waveforms having reversed polarities. When the waveform of the
electric energy outputted from the output electrodes 112a and 112b is the positive phase, the
inductor 105, electric energy storage section 104, the first switch means 101, output electrode
112a, patient 113, and the output electrode 112b are connected so that these can form the closed
circuit, ~~and in.~~ In the case where the waveform of the electric energy outputted from the output
electrodes 112a and 112b is the negative phase, when the first switch means 101 is closed, the
inductor 105 and the electric energy storage section 104 form the closed circuit, and when the
first switch means 101 is opened, the inductor 105 and the electric energy storage section 104 are
electrically separated, and the delivery of the electric energy to the output electrodes 112a, and
112b is conducted by the inductor 105.
